MCP

is a standard for giving Agents a way of comunicating with External Dota Sources

MCP Server

ore scripts/processes that manage the data-interaction to/from the External Data Sources

MCP Client is where the Agent lives and interacts with a user MCP Server Data Source MCP Client MCP Server Data Source MCP Server Data Source MCP Server Data Source

-Point of MCP is that it does Tool Planning
for you

- Money MCP Servers are available (just Google

- One bottleneck is creating your own
- One bottleneck is creating your own
- Claude Desktop
- Cursor
- 1. Divid Sural
- WindSurf
